CareerScout.

TINYFISH · LIVE WEB

LIVE JOB DISCOVERY · STEP 8

Less scrolling. Better signals.

Search live career pages and job portals with one or three targeted queries, follow relevant job links, deduplicate repeated openings, and rank fetched roles against your preferences. Inspect field-level evidence and distinguish apply actions from role and careers pages.

Your opportunity brief

Standard mode uses one TinyFish Search query; Expanded mode uses up to three targeted queries. Both cap Fetch at 15 page URLs. Expanded mode may consume more API credits. Your key stays on the server.

Verification policy: missing deadlines, eligibility, location, and application links stay blank rather than being guessed. A fetched page is not proof that a role remains open. Confirm availability and requirements on the employer's application page. Search and fetch results may be incomplete or blocked by a site. CareerScout follows relevant links for up to three batches of five URLs each to limit latency and API usage.
